- R146 The data in the IE corresponds always to the current (latest) version of the Export operation data. This means the declaration data are eventually upgraded with the information brought in by the exit control results (IE518).
- R150 The attribute "Corrected value" of the data group "RESULTS OF CONTROL" is linked with each single attribute that can be subject of a control and therefore it must reflect the same characteristics of the original message attribute.
- R160 The data group CONTROL RESULTS must be present in case the declaration is submitted under simplified procedure.
- R165 The data group SEALS INFO must be present if the declaration is submitted under simplified procedure and if the authorisation foresees to use seals.
- R175 Two possible values : "0" = "No" : Request to cancel initiated by Trader
"1" = "Yes" : Request to cancel initiated by Customs
- R180 Two possible values : Cancellation refused by Customs : Decision = "0" (=NO)
Cancellation accepted by Customs : Decision = "1" (=YES)
- R232 "Variable Holiday Date" is used as a flag and can contain 2 possible values:
"0" : the holiday date is fixed and thus the year doesn't have to be specified (e.g. Christmas = 25 December
"1" : the holiday date is variable and therefore the year will need to be specified together with the date (e.g. Easter Monday)
- R235 This attribute is used as a flag, its value can be either '0' ('final') or '1' ('partial').
- R246 "Customs sub place" and "Arrival Agreed Location Of Goods / Arrival Agreed Location Code" can not be used at the same time.
- R267 For international IEs, the value of the attribute is always in EUR.
- R325 If there are already seals identified in the AAR/AER and/or Arrival Notification/Arrival at Exit (IE507) then 'State of seals' is required.
- R330 The use of paper loading lists having been suppressed and all offices being NCTS offices, this data-group/attribute can no longer be used.
- R335 The data groups "CONTROL RESULT" and where necessary "SEALS INFO" become required only when a control by Customs took place at premises of the Authorised Consignor /Trader Exporter.
- R355 Only "GOODS ITEMS" showing discrepancies are sent back to the Office of Departure/Export.
- R410 The IE consist of top level data groups. Each top level data group has its own data group ACTION which attributes apply to the top level data group and its subsequent sub data groups.
The sender of the IE will always (in case of Create, Update and Delete) send all values of the occurrence.
The "Operation" attribute is used to indicate what action is applied to the occurrence in the IE. Its value can be:
"C" (create) , "U" (update), "D" (delete).
The "Validity date" together with the attribute "Modification Subtype" allow the following mechanism;
An occurrence becomes invalid as of the specified "Validity date" when the value of "Modification Subtype" is set to "0" (implies an implicit end date).
An occurrence and all values of the attributes become valid as of the specified "Validity date" when the value of "Modification Subtype" is set to "1".
The values of the attributes become applicable as of the "Validity date" when the value of "Modification Subtype" is set to "2" (this is when the value of the attribute(s) change).
"C" (create) :
The create operation is used to create a new occurrence of an entity;
"U" (update):
The update operation is used to change an existing occurrence. It can render an existing occurrence invalid or it can modify existing values of attribute(s) of an occurrence;
"D" (delete):
The delete operation is used to physically delete an occurrence. This operation must only be used when data has been created erroneously.
- R411 The 'Operation' attribute is used to indicate what action is applied:
'C' (create), 'D' (delete).
In case of "updates", the data group 'SYSTEM UNAVAILABILITY' to be updated will be first deleted and then (re)-created.
- R422 This attribute refers to the content of Column 2 in the UN/LOCODE. Column 2 shows the names of the locations (city names) which have been accepted for inclusion in UN/LOCODE, in accordance with the provisions of Recommendation n° 16 (see Rule 460).
- R425 The attribute "Season Code" is NOT used as a flag. It is possible to have up to 9 different "seasons" in a year, depending on a defined time period, which is completely covering the year-period.
- R430 The "Day in the week (end)" must be equal or greater then the "Day in the week (begin)".
- R445 The SENSITIVE GOODS CODE consists of two parts: the first part represents the HS6 six digit commodity code of the TARIC system, the second part represents the "Sensitive Goods Code" which is a two numeric digit code, to be defined by DG TAXUD. This two digit numeric "Sensitive Goods Code" is only used when the 6 digit HS6 code is not specific enough to identify the concerned goods (example: the codes "0405xx" and "2208xx" in the TARIC system cover both sensitive and non sensitive goods, or more than one sensitive good, and must be extended to 0405xx.01 and 2208xx.01 in order to uniquely identify the sensitive goods). These codes are used in the "List of Goods which when transported give rise to an increase in the Flat-rate Guarantee" (see proper domain).
- R456 For "Package Code" use the alphabetic two-digit UN-code going from "AE" = "aerosol" to "WB" = "Wickerbottle".
- R460 This UN/LOCODE refers to the 3 digit alphabetical code of the second part of Column 1 in the UN/LOCODE - Code for Ports and other Locations . Column 1 shows in a first part the ISO 3166 alpha-2 Country Code, which is followed by a space and a 3-alpha code for the city (location) name: XX XXX. This combination is invariably identifying the "City Name". This UN/LOCODE city name is used as an attribute in the "CUSTOMS OFFICE LSD" entity.
- R470 The IE15 allows the usage of commodity codes up to 8 digits (national), however only the first six digits are sent to destination with the AAR (international) and to the Office(s) of Transit with the ATR (international).
- R486 This attribute can be used to indicate potential specific characteristics of the Customs Office, namely regarding variation of opening hours (e.g. during public holidays, etc.), operational and/or procedural restrictions (e.g. competent only for simplified procedures, competent only for certain goods, the only office authorised to accept flat-rate guarantees, etc.). This attribute will be coded by DG TAXUD after clear definition of the need of the NAs.
- R489 Reference Number Main Office is used to indicate the Customs Office (local) to which the Customs Office in question is subordinate. The use of this attribute is left up to the NAs.

- R490 Reference Number Higher Authority is used to indicate that the Customs Office in question has a higher authority. As a consequence this attribute becomes required when the Office in question has a higher authority.
- R495 Reference Number Take-over is used to indicate another Customs Office that replaces (take-over) the Customs Office in question when the latter is no longer able to perform NCTS operations.
- R500 At least 1 of the 4 attributes must be present.
- R501 Only corresponding values which are carried over from a previous message may be used.
- R605 For an international IE38 / IE538 the values of this attribute must be amongst those defined by the common domain (see IE32, data group TRANSIT OPERATION STATE TYPE / EXPORT OPERATION STATE TYPE).
- R660 The time has to be given in the format YYYYMMDDHHMM where:
 YYYY = Year
 MM = Month
 DD = Day
 HH = Hour
 MM = Minute
- R700 This information is not required when goods of different type covered by the same declaration are packed together in such a way that it is impossible to determine the gross mass of each type of goods.
- R804 The data group 'TRADER Consignor' must be used if it is different from the data group 'PERSON Lodging the summary declaration'.
- R819 Only those occurrences of the data group shall be included in the message for which the last digit of the attribute 'Risk Analysis result code' has one of the following values: 'D', 'E', 'Z'.
- R824 The 'Item Number (box 32) involved' shall be indicated if the risk analysis result relates to an item of an Entry summary declaration (ICS), Exit summary declaration or Export declaration (ECS) or Transit declaration (NCTS). In any other case the attribute 'Item Number (box 32) involved' shall not be used.
- R830 The attribute cannot be used if the value of the attribute 'Procedure requested' is 76 or 77.
- R831 If the value of the attribute 'Procedure requested (box 37.1)' is 76 or 77 or if value of the attribute 'Previous procedure (box 37.1)' is 71 or 78, the attribute 'Identity at departure' can not be used.
- R832 If the value of the attribute 'Procedure requested (box 37.1)' is 76 or 77 or if value of the attribute 'Previous procedure (box 37.1)' is 71 or 78, the attribute 'Gross mass' is required either at EXPORT OPERATION or at GOODS ITEM level.
- R837 The EORI Trader Identification number (TIN) shall be declared.
- R838 The attribute is required where the attribute COMMODITY CODE.TARIC first additional code or COMMODITY CODE.TARIC second additional code contain an agricultural (refund) code, and where the attribute 'Procedure requested (box 37.1)' contains the codes 10, 11 or 23, and where the first digit of the attribute 'Inland mode of transport (box 26)' is other than '5' or '7'.
 Note: The legislation does not exclude the modes of transport '5' and '7', but it is logical to exclude them since the identity of means of transport in case of post is not known when the declaration is lodged; and it does not exist in case of fixed transport installations.
- R839 The 'Specific circumstance indicator' with value 'E' (AEO) can be used only if the 'Person lodging the exit summary declaration' and all 'Consignors' declared in the exit summary declaration/ 'Declarant' and all 'Exporters' declared in the export declaration have a valid AEO certificate of type 'AEOF' or 'AEOS'.
- R840 If the Trader has a valid EORI Trader Identification number (EORI-TIN) or "a third country unique identification number (TCUIN) which has been made available to the Union by the third country concerned", then the EORI-TIN or TCUIN shall be declared. Other than EORI-TIN or TCUIN shall not be used, otherwise the declaration will be rejected.
- R852 The attribute 'Transit' is set to '1' (yes), if a transit procedure is issued after Export (the Export operation is – from a fiscal viewpoint- to be considered as 'exited'). In this cases the issued transit document (MRN) must be indicated in the Data group 'Produced Documents/Certificates'. In any other case the attribute 'Transit' is set to '0' (no).
- R853 The amendment request must be sent to the Member State where the Office of Exit (declared in the initial version of the Exit summary declaration) is located.
- R854 The amendment request must be sent to the Member State where the Office of Export (declared in the initial version of the Export declaration) is located.
